

I am an avid listener to K-LOVE which is 92.1 in the Austin, Tx area and I can not imagine it being replaced on my station. My children listen to this station and it is the only station that rounchy sexually inappropriate conversation can be avoided. Almost all of my friends also listen to this station daily and is a large source of encouragement and resource to hurting people. There are always informational spots that link people to other resources of help. This is a public service K-LOVE is providing to people like me and thousands of others in that we can listen to music and commentary from other stations but K-LOVE gives us wholesome, encouraging music in a format that does not put our families at risk. When my children are in the car, I do not have to turn the music down or explain things their minds are not ready to understand. I beg you to please stop the plan to allow Low Power FM stations to replace my beloved K-LOVE. They are important to me, family, my friends, and my community. Thank you.
